

<i>Image</i>	
Knows (≈nouns)	Does (≈verbs)
Number of pixels in x, y directions Number of color channels The pixel data (individual pixels?)	Public getters/protected? setters Public interfaces and some implementations

<i>Netpbm(Image)</i>	
Knows (≈nouns)	Does (≈verbs)
(inherited members/interface from Image) “Magic Number” indicating file type Maximum value for pixel entries	Public getters/protected? setters Some method implementations

<i>PBM(Netpbm)</i>	
Knows (≈nouns)	Does (≈verbs)
(inherited members/interface from Netpbm) Other?	Concrete object instantiation Possible method overrides?

<i>PGM(Netpbm)</i>	
Knows (≈nouns)	Does (≈verbs)
(inherited members/interface from Netpbm) Other?	Concrete object instantiation Possible method overrides?

<i>PPM(Netpbm)</i>	
Knows (≈nouns)	Does (≈verbs)
(inherited members/interface from Netpbm) Other?	Concrete object instantiation Possible method overrides?
